Robert W. Brandt	Director, International Forestry
Loyd LaMois	Assistant Director, International Forestry
Alexander Vasilvesky	Forest Survey Project St. Paul, Minnesota (Interpreter)
Miroslav Czapowskyj	Culture of Northeastern Conifers Orono, Maine (Interpreter)

1. The specialists on harvesting and reforestation met in Washington, D.C. on October 28 and considered:
 - (a) The Forest Service organization.
 - (b) Cooperation between the USSR and the US in the area of reforestation and afforestation including site preparation, planting, thinning, and breeding of woody species. In the future it would be rational to have exchanges of specialists and information on shelterbelts, breeding, and an exchange of woody species seeds.
 - (c) Cooperation in the area of harvesting including equipment development, field practices, and transportation of forest crops.

2. A field trip was taken to inspect forest practices and mechanization in both reforestation and harvesting. Travel centered in and around Raleigh, North Carolina; Gainesville, Florida; and Gulfport, Mississippi with numerous other stops enroute.
3. The Soviet delegation expresses thanks to all the people who helped develop and carry out the program of travel throughout the Southeastern United States.
4. Both sides agreed that cooperation in the fields of harvesting and reforestation is mutually beneficial and steps should be taken to continue the exchange of scientific specialists and information and also to define future program objectives.
5. Both sides commend the business-like and friendly atmosphere under which the current exchanges took place in Washington, D.C. during the travel of the delegation, and at the close-out session in New Orleans.

The minutes are recorded and signed in New Orleans, Louisiana, November 7, 1975, in two copies in English.

Leader of the Soviet Delegation
N. Botolov

Chairman of American Part
of the Working Group on Forestry
M. B. Dickerman
